

EN 1090-1
CE marking for structural
steel and aluminium

Client declaration

CE marking for structural steel and aluminium

CE and UKCA marking for structural steel and aluminium CE marking of structural steel and aluminium is mandatory under the requirements of the Construction Products Regulation (CPR). Since 1st July 2014 its been illegal to trade fabricated steelwork and aluminium and related products on the European market without CE marking, from the 31st December 2021 Great Britain will no longer accept CE marking as proof of compliance and the products are required to be UKCA marked to gain market access.

To help us understand your business and provide you with the best possible service to help you to get Factory Production Control to EN 1090-1, please take a moment to answer the questions below. When you have completed this, please save your file and email back to product.certification@bsigroup.com or directly to your sales contact at BSI.

This is a formal declaration of the services you require from BSI, the information in this form will be used for assessment and certificate generation.
