BSI Training Academy

ISO 31000 **Implementation** training course

Essential information about the course

Level **1** **2**

All organizations face uncertainty in meeting their objectives. But implementing a robust risk management approach using ISO 31000 can help you prepare and make better decisions to protect your organization.

If you've already got a thorough understanding of ISO 31000 and need to implement the standard in your organization, then this course is for you. Most delegates on this course have already attended our ISO 31000 Introduction course and are ready to take their knowledge further.

By attending this two-day course you'll gain the skills to conduct a base-line review of your organization's

current position and implement the key risk management principles of ISO 31000. Using a step-by-step approach, you'll learn how to develop an implementation plan, create necessary documentation, develop your risk management process and achieve continual improvement. Plus you'll understand governance and leadership roles when managing risk at all levels.

Packed with practical activities, group discussion and classroom learning, our expert tutors will make sure you complete the course feeling confident to apply your new knowledge as soon as you step back inside your organization.

Our course agenda:

Day 1

- Welcome and introductions
- Refresh ISO 31000:2018 guidelines
- Implementation process and integration
- Overall tasks and activities
- Baseline gap analysis and task/gantt chart
- Create a gantt chart
- Designing the risk management framework
- Determine leadership, commitment and integration
- Understanding the context
- Risk management policy
- Articulating commitment, roles and responsibility
