GOALS**

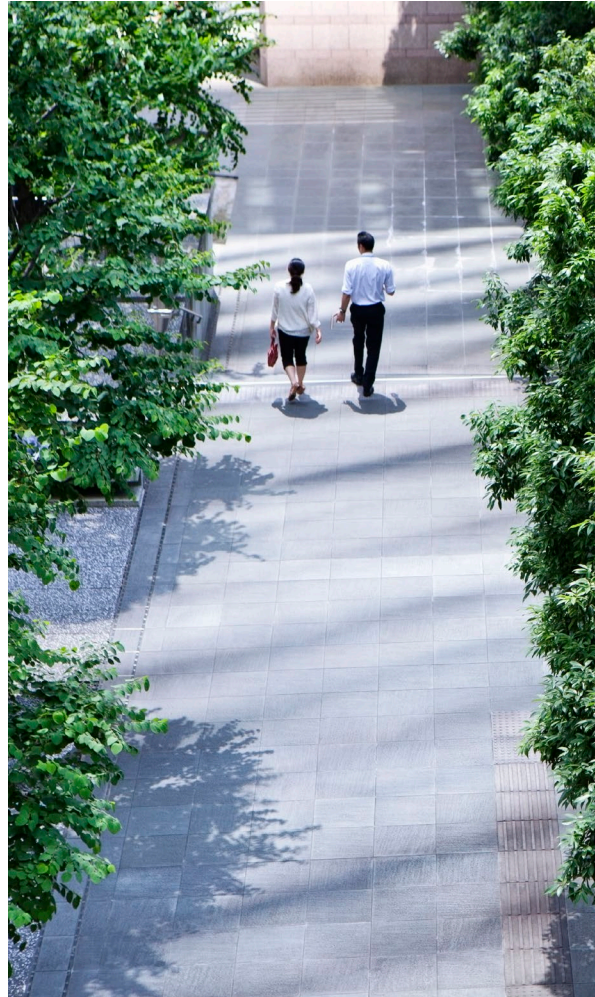

# Great environmental management needs great people

**ISO 14001 is the world's most recognized environmental management system.**

It provides guidance on how to consider multiple aspects of your business procurement, storage, distribution, product development, manufacturing (and more), so that it reduces its impact on the environment.

Whether you're developing or formalizing your environmental management system (EMS), your organization will need the expertise, support, and collaboration of your people to deliver on your objectives.

That's where our courses and qualification pathways can help.

**Our ISO 14001 courses and qualifications can help you get closer to where you need to be:**

## Benefits to the organization:

- **Raise internal standards** and embed best practice, helping reduce risks, increase customer satisfaction, and streamline processes
- **Build your teams capability**, through increased breadth and depth of learning, based on their current experience
- **Grow opportunities**, and overcome uncertainty through your greatest asset, your people
- **Retain top talent** by building a culture of learning, that brings clarity to growth opportunities
- Use the **BSI Mark of Trust** to demonstrate the competence of your people
- Benefit from **accessible learning**, so your team can build practical skills, without disrupting work deliverables

## Benefits to the individual:
