

BSI Training Academy

Requirements & Implementing ISO/IEC 27001

training course

Essential information about the course

Level 

As internationally recognized best practice for an information security management system (ISMS), ISO/IEC 27001 helps organizations to build resilience and protect information. So it's no surprise that companies invest in training their people to get the knowledge and skills to use ISO/IEC 27001 to secure their business.

If you've already got an understanding of ISO/IEC 27001 and need to implement a management system then this course is for you.

This training provides an excellent introduction to the standard and the importance of information security to you and your interested parties. You will also learn how best to implement the requirements, as well as how to carry out a gap assessment.

The three-day course is structured to optimize your learning using our unique accelerated approach, which blends practical activities, group discussions and classroom learning.

Our course agenda

Day 1

- Information Security Management (ISM)
- Background to ISO/IEC 27001 and ISO/IEC 27002
- Clause 4: Context of the organization
- Clause 5: Leadership
- Clause 6: Planning
- Clause 7: Support
- Clause 8: Operation
- Clause 9: Performance evaluation
- Clause 10: Improvement
- Reflection and feedback

Day 2

- Key terms and definitions
- Implementing a management system
- Requirements and documentation
- Baseline gap analysis
- Context
- Interested parties
- Scope
- Leadership

Upon successful completion of your course, you'll receive an internationally recognized BSI certificate.

Requirements & Implementing ISO/IEC 27001

training course
