Virtual consulting capabilities – Protecting your people, information and business

As ever, organizations need to address the information resilience challenge and continue to focus on their cybersecurity, data management and privacy strategies targeted at protecting their people, information and business. BSI is here to help with our suite of advanced remotely delivered services
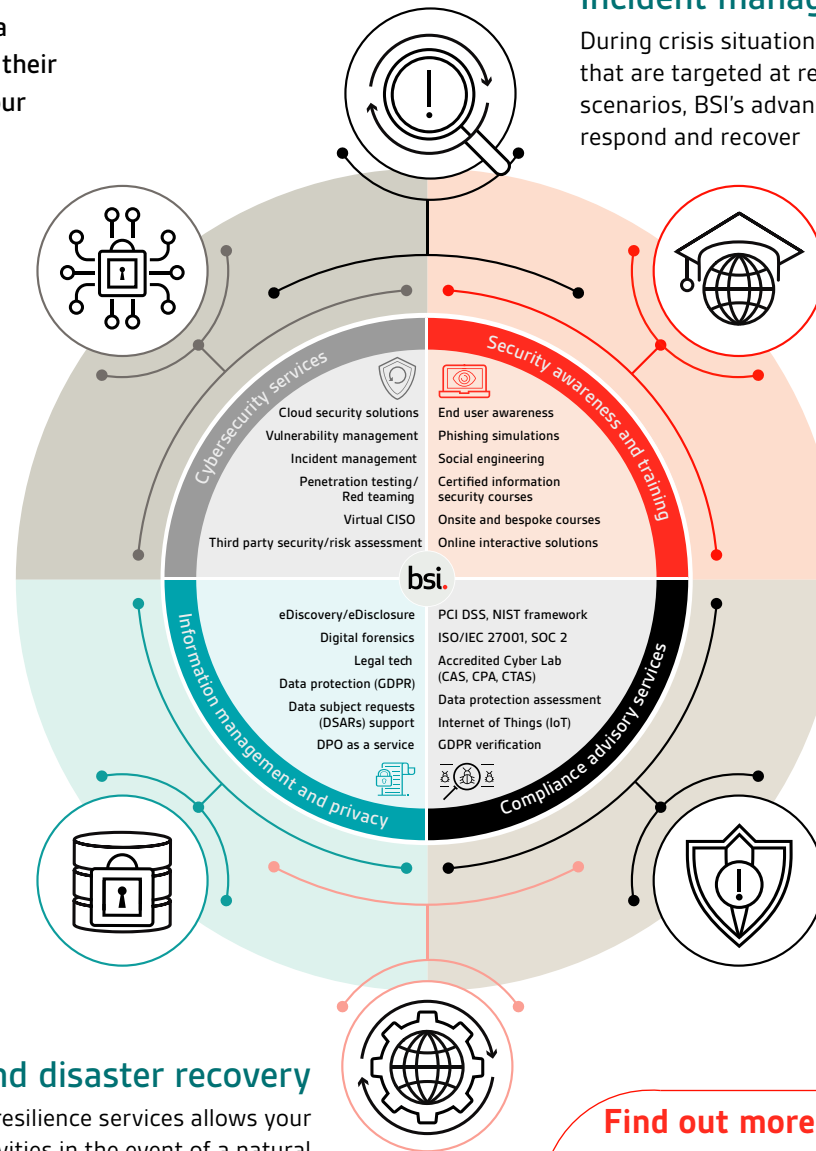

Incident management

During crisis situations, organizations are more vulnerable to cyber-attacks, that are targeted at remote users or overwhelmed teams. In those complex scenarios, BSI's advanced incident management capabilities help you respond and recover

Remote security testing and enterprise security technology

Many organizations are managing recurring internal and external security testing tasks. Performing those activities remotely will allow you to continuously identify vulnerabilities while not having security testing personnel required onsite. BSI's security testing consultants are experts in the delivery of remote services. We also provide enterprise security technology delivered using remote techniques. Take our web security capabilities; implemented via a remote site, leveraging our cloud-based technology partners' infrastructure along with our specialist cloud security consultancy team

Online training

Upskilling employees is a fundamental requirement in reducing the risks caused by human related cyberattacks such as phishing. Our SaaS based security awareness platform and virtual training courses can be delivered remotely and seamlessly ensuring an enhanced client experience. Moreover, our tutor-led interactive learning courses can now bring the classroom to you

Forensic and information management services

eDiscovery, digital forensic support and information management services are remotely available through our secure collaboration solutions. Our consultants deliver offsite services to allow our clients to avoid disruption in mandatory legal and critical activities. Should you receive a Data Subject Access Requests (DSARs), for example, with our remote techniques BSI can help you fulfil this requirement promptly

Cyber, risk and advisory (CRA) services

Security governance services are important for an effective security program. Our CRA services include ISO/IEC27001 consultancy, implementation support, gap analysis, NIST CSF advisory, GDPR and CCPA services, Data Protection Officer (DPOaaS) services, Data Protection Impact (DPI) assessments, PCI DSS consulting and compliance services. All of these and other CRA services are regularly delivered remotely by BSI consultants

Central diagram

Cybersecurity services
- Cloud security solutions
- Vulnerability management
- Incident management
- Penetration testing/ Red teaming
- Virtual CISO
- Third party security/risk assessment

Security awareness and training
- End user awareness
- Phishing simulations
- Social engineering
- Certified information security courses
- Onsite and bespoke courses
- Online interactive solutions

Information management and privacy
- eDiscovery/eDisclosure
- Digital forensics
- Legal tech
- Data protection (GDPR)
- Data subject requests (DSARs) support
- DPO as a service

Compliance advisory services
- PCI DSS, NIST framework
- ISO/IEC 27001, SOC 2
- Accredited Cyber Lab (CAS, CPA, CTAS)
- Data protection assessment
- Internet of Things (IoT)
- GDPR verification
