Certified Information Privacy Technologist
(CIPT®) training course

Level 1 2 3 4

Essential information about the course

As new technologies develop and privacy regulations become more prominent, there is a growing demand for individuals who can make sure privacy is considered at the primary stages of IT product and service lifecycles.

With our Certified Information Privacy Technologist (CIPT) training course, you get the knowledge and skills to understand data protection laws and privacy techniques that can be successfully embedded into your IT infrastructure.

This two-day course covers critical privacy concepts, practices and principles that impact IT and security. By attending this training you'll gain the knowledge and skills required for the International Association of Privacy Professionals (IAPP) CIPT exam, which will get you certified status.

Course outline

Over the two days you will work through the following topics:

- Understanding the need for privacy in the IT environment
- Core privacy concepts
- The information lifecycle: an induction
- Common privacy principles

- Privacy considerations in the information lifecycle
- Privacy in systems and applications
- Privacy techniques
- Online Privacy Issues
- Technologies with privacy considerations

Upon successful completion of the course, you'll receive a BSI certificate.

To achieve certified status you will need to complete IAPP CIPT exam. Please note the cost is included in the course; however you will need to complete the IAPP CIPT exam.
