

befree gained competitive edge in the business through BSI Privacy Information Management (ISO/IEC 27701) certification

befree provides accounting and taxation outsourcing services to its clients in the United Kingdom and the European Union. With a highly simplified framework and a hybrid on-shore/off-shore business model, our cost-effective accounting and planning solutions assist clients increase their efficiencies.

befree, are among the leading organizations to achieve ISO certification in ISO/IEC 27701:2019 for Data protection and standardization to secure data assets certified by British Standard Institution (BSI).

These certifications supported Befree in creating the following:

- Improved security of the data assets for our clients, resources and people.
- Assurance of the confidentiality, integrity and availability of data to our existing and prospective clients.
- Gain competitive edge in the business service industry especially for our UK & EU customers wherein we are bound by the GDPR laws.

The benefits

Through the implementation and certification of ISO/IEC 27701:2019, befree has been able to establish that all the necessary data security measures and data protection checks are in place to safeguard the huge amounts of client's data which it holds for delivering its services.

BSI solution

Since befree operates in the UK and EU market, where the customers are very wary of data protection and privacy; it was critical for us to implement all the checks and measures as well as policies, to ensure data security and protection.

The Associate Director for UK Operations - Vijayan Tayyil stated “Going with BSI for the PIMS certification and audit, we really found the path to be very smooth and straight-forward.”

He went on to further add, “The auditor was extremely knowledgeable and experienced and helped us break down the objectives and guided us step-by-step through each section. We on our end ensured that we have the right people from our top management to Technical Support who were aligned as per each objective of the audit process taking each step in a very measured fashion.”

Why BSI?

When it comes to establishing standards for data security, privacy, and protection, BSI is a frontrunner. As a result, befree chose BSI for this certification. BSI has provided all of the required information and system recommendations to assist in the preparation for this certification and subsequent audit.
