## Section 2: Assessment Process

BSI is a leading global provider of management systems assessment and certification, with more than 92,000 certified locations and clients in over 193 countries. BSI Standards is the UK's National Standards Body. BSI provides independent, third-party certification of management systems.

### Assessment Methodology, Programme, Site Visits

This on-site assessment was conducted from 07-11/03/2022. The audit programme is included as Section 2.4. The approach to the audit was to treat the MPOB SPOC Beaufort (S8) as a MSPo Certification Unit. A range of environmental and social factors were covered. This includes consideration of topography, palm age, proximity to areas with HBVs, declared conservation areas and local communities. 30 days prior to audit, public notification posted in the BSI website as per the following link:

[https://www.bsigroup.com/globalassets/localfiles/en-my/mspo/Public%20Notification/2022/02-1-mspo-public-notification\\_recertification\\_spoc-s8-beaufort\\_english.pdf](https://www.bsigroup.com/globalassets/localfiles/en-my/mspo/Public%20Notification/2022/02-1-mspo-public-notification_recertification_spoc-s8-beaufort_english.pdf)

The methodology for collection of objective evidence included physical site inspections, observation of tasks and processes, interviews of staff, workers and their families and external stakeholders, review of documentation and monitoring data. MS 2530-2:2013 were used to guide the collection of information to assess compliance. The comments made by external stakeholders were also taken into account in the assessment.

The Certification Unit were not using MSPo certification marks for any type of on- and off-product communication. The Certification Unit are compliance with the use of the MSPo Logo and related claims.

The estates or smallholders' sample were determined based on formula  $S = r\sqrt{n}$  where n is the number of estates while when applicable, the smallholder's sample were determined following the MSPo Certification Requirement. The sampling of smallholders was based on the formula  $(r\sqrt{n})$ ; where r is the risk factor (may defers 1, 1.5 and 2 depending on risk), where n is total number of group members. From the total of 852 smallholders, 770 are the existing members and 82 are new members. Samples were derived from the formula  $S = r\sqrt{n}$  separately with risk factor 1.5. Therefore, 11 samples from the existing members and 33 from the new members, which makes the total 44. The sampled smallholder listed in Appendix B.

Meetings were held with stakeholders to seek their views on the performance of the company with respect to the MSPo requirements and aspects where they considered that improvements could be made. At the start of each meeting, the interviewer explained the purpose of the audit followed by an evaluation of the relationship between the stakeholder and the company before discussions proceeded. The interviewer recorded comments made by stakeholders and these have been incorporated into the assessment findings.

Structured worker interviews with male and female workers and staff were held in private at the workplace in the mill and the estates. Fieldworkers were interviewed informally in small groups in the field. In addition, the wives of workers and staff were interviewed in informal group meetings at their housing. Separate visits were made to each of the local communities to meet with the village head and residents. Company officials were not present at any of the internal or external stakeholder interviews. A list of Stakeholders contacted is included as Section 3.6.

This report is structured to provide a summary of assessment finding as attached in the Section 3. The assessment was based on random samples and therefore nonconformities may exist that have not been identified.

All the previous nonconformities are remains closed. The assessment findings from the initial assessment are detailed in Section 4.2.

## Section 3: Assessment Findings

### 3.1 Details of audit results

This assessment has been assessed using the following MSPO normative requirements. The assessment details are provided in Appendix A.

- MSPO MS 2530-2:2013 – General Principles for Independent Smallholders
- MSPO MS 2530-3:2013 – General Principles for Oil Palm Plantations and Organized Smallholders
- MSPO MS 2530-4:2013 – General Principles for Palm Oil Mills

### 3.2 Details of Nonconformities and Opportunity for improvement

The nonconformity is listed below. The findings summary of the assessment by criteria are listed in Appendix A.

During the assessment there were One (1) Major & One (1) Minor nonconformities and One of OFI (1) raised. The MPOB SPOC Beaufort S8 Certification unit submitted Corrective Action Plans for the nonconformity. Corrective action plans with respect to the nonconformity was reviewed by the BSI audit team and accepted.

The implementation of the corrective action plans to address the minor nonconformity will be followed up during the next surveillance assessment. The implementation of the Corrective Actions for the Major Non-conformity(ies) has been verified for its effectiveness and closed accordingly. The below is the summary of the non-conformity raised during this assessment
