## Section 2: Assessment Process

BSI is a leading global provider of management systems assessment and certification, with more than 92,000 certified locations and clients in over 193 countries. BSI Standards is the UK's National Standards Body. BSI provides independent, third-party certification of management systems.

### Assessment Methodology, Programme, Site Visits

This on-site assessment was conducted from 04-07/09/2023. The audit programme is included as Section 2.4. The approach to the audit was to treat the SPOC Maludam, Pusa & Debak (Q9) as a MSPO Certification Unit. A range of environmental and social factors were covered. This includes consideration of topography, palm age, proximity to areas with HBVs, declared conservation areas and local communities.

The methodology for collection of objective evidence included physical site inspections, observation of tasks and processes, interviews of staff, workers and their families and external stakeholders, review of documentation and monitoring data. MS 2530-2:2013 were used to guide the collection of information to assess compliance. The comments made by external stakeholders were also taken into account in the assessment.

The Certification Unit *not using* MSPO certification marks for any type of on- and off-product communication. The Certification Unit are compliance with the use of the MSPO Logo and related claims.

The estates or smallholders sample were determined based on formula  $S = r\sqrt{n}$  where n is the number of estates while when applicable, the smallholders sample were determined following the MSPO Certification Requirement. The sampling of smallholders were based on the formula  $(r\sqrt{n})$ ; where r is the risk factor (may defers 1, 1.5 and 2 depending on risk), where n is total number of group members. From the total of 948 smallholders, 854 are the existing members and 94 are new members. Samples were derived from the formula  $S = r\sqrt{n}$  separately with risk factor 1.5. Therefore, 12 samples from the existing members and 35 from the new members, which makes the total 47. The sampled smallholder listed in Appendix B.

Meetings were held with stakeholders to seek their views on the performance of the company with respect to the MSPO requirements and aspects where they considered that improvements could be made. At the start of each meeting, the interviewer explained the purpose of the audit followed by an evaluation of the relationship between the stakeholder and the company before discussions proceeded. The interviewer recorded comments made by stakeholders and these have been incorporated into the assessment findings.

Structured worker interviews with male and female workers and staff were held in private at the workplace in the mill and the estates. Fieldworkers were interviewed informally in small groups in the field. In addition, the wives of workers and staff were interviewed in informal group meetings at their housing. Separate visits were made to each of the local communities to meet with the village head and residents. Company officials were not present at any of the internal or external stakeholder interviews. A list of Stakeholders contacted is included as Section 3.6.

This report is structured to provide a summary of assessment finding as attached in the Section 3. The assessment was based on random samples and therefore nonconformities may exist that have not been identified.

All the previous nonconformities are remains closed. The assessment findings from the reassessment are detailed in Section 4.2.

<b>Requirement:</b>	Group managers shall ensure that waste from the smallholdings is disposed of appropriately. Smallholders shall adopt local and national legislation to dispose of hazardous chemicals and their containers.		
<b>Statement of Nonconformity:</b>	Disposal of waste (hazardous chemicals and containers) from the smallholders was not effectively implemented.		
<b>Objective Evidence:</b>	<p>During site visit at smallholder farm named Raymond Anak Kassim, it was found that used lubricant for knapsack sprayer was stored in the other container without any labelling.</p> <p>During site visit at smallholder farm named Mundok Anak Mambang, it was found that empty chemical pack brand Metfuron 20 was left unattended. Also sighted the empty lubricant container were used as domestic purpose. During interview with smallholder named Baki Anak Jalal, he stated that the empty chemical containers were burned for disposal purpose. It shows that lack of understanding and knowledge on management of schedule waste. It was not in line with Prosedur Kerja Standard – Pengurusan Bahan Buangan Terjadual with document no: MSPO/SPOC/SOP-04/BT Issue 04 Rev. 04 dated 01/06/2020 (2) "Sekiranya ada, Bahan Buangan yang telah dikenalpasti hendaklah di lupuskan mengikut prosedur yang di ditetapkan" and (4) "Bahan Buangan terjadual tidak dibenarkan sama sekali di tanam atau di bakar".</p>
