Payment Card Security Services (PCI DSS)

Because we know that "compliant" doesn't always equal "secure", our approach to compliance goes far beyond simply checking the boxes.

BSI's goal is to help our customers make sense of their security and compliance requirements by putting them in a business context. It begins with listening carefully to understand your business model, and identifying opportunities to reduce scope, cost, and risk, while meeting and exceeding compliance requirements. From there we perform a thorough assessment of your controls and risk, and provide actionable recommendations that are specifically tailored to your business and security needs.

Our Qualified Security Assessors (QSAs) leverage BSI's proven methodologies. Their many years of security, IT, development, and PCI auditing experience ensures that whatever your goals, the outcome is exactly what you need and makes strategic sense for your business. Whether you've been asked by your bank "to comply with PCI", or preparing for your first validation with a Report on Compliance (ROC), gearing up for annual re-validation, or would just like to know what the PCI DSS mean to your business, our team of experts are there to help.

All of our services are delivered by some of the most experienced Qualified Security Assessors in the business, experts who take the security and compliance of your customers very seriously. We've worked with budding startups as well as some of the largest brands on the planet to provide strong guidance, program development, and expert auditing of their environments.

Our QSA experts, mature methodology, and continuum of PCI DSS services can help your organization:

- Understand your PCI scope and compliance requirements

- Secure your cardholder data environment, reducing risk and cost of fines and data breaches

- Develop and execute a PCI strategy based on your organization's unique security, compliance, and budgetary goals and objectives

- Reduce or eliminate PCI scope and associated risk

- Leverage your existing security program to meet compliance requirements

- Manage complex remediation and Project Management initiatives

- Prepare for your Self-Assessment or audit with our expert gap analysis and remediation advice

...making excellence a habit.™

Where some Qualified Security Assessor firms focus on "checking the boxes", our team of experts use their industry-leading experience and our proven methodologies to help you navigate the complexities of the compliance process, providing the strategic and tactical guidance that you need to make informed decisions to meet your security and compliance goals.

If your organization is looking for a checkbox QSA that will give you a pass with no questions asked, we're probably not a good fit; but if you're serious about your security and compliance programs and want to work with some of the most experienced QSAs on the planet, we look forward to hearing from you.

We have a continuum of services designed to complement your compliance program, which include:

- PCI DSS advisory and program consulting services

- PCI DSS gap assessment

- Self-Assessment Questionnaire assistance

- PCI Remediation Project management

- Level 1 PCI Report on Compliance audit

- PCI Training offerings through our online Learning Management System

- Penetration testing services

- PCI Approved Scan Vendor services
