

BSI Group and OCS Europe: Certification for a more sustainable future

Supporting the European
Union's Green Deal

What is the OCS scheme about?

The Operation Clean Sweep (OCS) scheme focuses on preventing the loss of plastic granules during production, ensuring responsible and sustainable environmental practices throughout the value chain.

Benefits of certification:

- **Reputation enhancement:** It enhances your organization's reputation by showcasing leadership in sustainable practices.
- **Sustainability commitment:** Certification signifies a strong commitment to sustainability, providing a certified seal that guarantees adherence to high standards.
- **Inspire trust:** This commitment not only inspires trust among stakeholders but also provides a competitive advantage in the market.

Why choose BSI?

Choosing BSI for certification not only ensures global recognition, commitment to sustainability and compliance, but also aligns your organization with a demonstrated commitment to recognized industry best practice. Integrating Operation Clean Sweep (OCS) with ISO 14001 through BSI not only ensures a systematic and stronger commitment to sustainability, but also provides a unique advantage that sets you apart in the competitive global market.

BSI drives your business to sustainability

BSI fosters excellence by sharing knowledge, innovation, and best practices globally through standards development, training, auditing, and certification.
